BUY WITH CONFIDENCE

In this list we offer one of the most complete assortments of trees and plants to be found in any Nursery in Ohio. We grow our own stock under the same climatic condition and in soil similar to yours. The quality is fine and the plants are well grown, freshly dug and carefully handled. All stock is always carefully dug to preserve all the roots so you know it can grow well for you.

Buy by mail or at our large sales ground. We shall be delighted to serve you well.

CONDITIONS OF SALE

Prices quoted herein are for plants of average size and quality and do not apply to materials specially selected in the fields. Such material will be charged for according to quality and service desired.

NON-WARRANTY. We are very careful to keep our varieties true to name, and we hold ourselves in readiness on proper proof, to replace free of charge any stock that may prove untrue to label, or we will refund the purchase price. We are liable at no time for more than the original price paid.

Prices subject to change without notice.

MAIL ORDERS

You are invited to visit the Nursery and select plants of your own choosing, but if you cannot drive to Clyde, you can always be sure your order by mail will receive careful attention.

Send your order by mail and prompt shipment will be made. Please include the 3% Ohio Sales Tax. Mail to The Clyde Nursery, Pickett & Sons, Clyde, Ohio.

Remit by check, bank draft, or money order. We do not ship C.O.D.

Orders for small plants can be sent by mail. Such items as Evergreens and Trees are too large for mail shipments and they are sent express or freight.

PICKETT'S OHIO GROWN FRUIT TREES

For more than ninety years we have given special attention to Fruit Trees, growing them with utmost care and skill in our own large Nurseries. Pickett's trees are good trees and are sold at reasonable prices. We propagate our Fruits under careful conditions, selecting buds from bearing trees of outstanding merits. This is your assurance that our trees are pure and of the best strains.

Well cared for in the Nursery, the trees are thrifty and well-rooted. We dig them carefully, running the digger very deep so that you get all the feeding and fibrous roots and you know the trees can grow.

The farmer and gardener who has bearing Fruit Trees makes money. Plant some trees this year and every year.

The laws of nature make trees bear better in groups, so plant more than one variety of each fruit so they may cross pollinate.

Number of Trees or Plants for an acre of Ground Set at Regular Distance Apart

Feet		Feet	
1 by 1	43560	5 by 5	1742
2 by 1	21780	6 by 6	1210
2 by 2	10890	8 by 8	680
3 by 1	14520	10 by 10	435
3 by 3	4840	16 by 16	170
4 by 1	10890	20 by 20	109
4 by 2	5445	25 by 25	70
4 by 4	2725	30 by 30	48
5 by 1	8712	35 by 35	35
5 by 3	2904	40 by 40	27
5 by 4	2178	50 by 50	17

Rule: Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant or hill; which divided into the number of feet in an acre (43560) will give the number of trees to an acre.

APPLE
